# Moire's Coming Back

## There is a sudden vogue for moire.

Not to be sure, the stiff black moire of our grandmothers' Sabbath gown that would stand alone, but its modern incarnation.

## This new moire is soft and lovely.

It is satin-backed and has itself the texture of fine satin, draping exquisitely. It is shown in all the brilliant high colors of the season with watered markings of various patterns.

## Moire's Ladies' Book would have

approved of a moire dress of this style sketched. Its puckered blouse, loose bell sleeves and rows of pleated frills are reminiscent of the days of elegance and chic. Not forgetting, besides, that they are decidedly fashionable in this season of 1922.

# Amusements

## Coming Next Week.

Miss Isabelle Lowe and the Academy Players will present "The Third Party," a delicious farce by Mark Kwan, as the attraction at the Academy all next week. The customary matinee are scheduled for Wednesday and Saturday. "The Third Party" was originally produced as a New York sensation by Ralph E. Cummings, director for Miss Lowe and her company, and Mr. Cummings himself will play the principal comedy role in support of the brilliant star. The play is the quintessence of good humor, its situations are absurdly amusing and its dialogue sparkles with comedy.

Miss Lowe will appear in the last two performances of the romantic "Idaho Time" today, matinee and night. This charming play of France, written by the distinguished actress Jane Cow, assisted by Jane Murdin, has proved one of the most thoroughly enjoyable offerings in a brilliant season. Enveloped in an atmosphere of color and romance, a French girl and an English army officer with a tenderness and a flow of comedy rarely achieved on any stage, "Idaho Time" has been designed to please the taste of those who like the best in theatricals.

## HOW TO SAVE WHEN SHOPPING

By Ruth Leigh.

Author of "The Human Side of Retail Selling," "The A B C of Retailing," etc.

Of all the small, insignificant things in our kitchen, bluing is probably the least thought of. Nevertheless, so important a substance can spoil many an expensive blouse or undergarment, so we can't afford to despise it. The bluing we buy today differ in composition as well as in form. The commonest are Prussian blue, aniline and ultramarine. Indigo is new rarely used. Bluing in solution colors fabrics more easily than bluing that is merely in suspension. "Hotte blues" are in many cases made of Prussian blue, an inexpensive soluble salt of iron. Unfortunately, however, they are easily decomposed by soap, and if the clothes are not

## Estemed Lynchburg Resident Declares Tanlac the Most Wonderful Medicine She Has Ever Seen. Gives Details of Her Case.

"Nobody knows how I suffered before I finally found relief by taking Tanlac," said Mrs. A. S. Roberson, 507 Thirteenth St., Lynchburg, Va. "I was terribly weak and nervous, and for three solid months was tormented almost constantly by a throbbing headache. My stomach was so badly out of order that many days I hardly dared touch a morsel of food. At night I would roll and toss about for hours, and when morning came I would feel worse than when I went to bed. Nothing seemed to help me a bit, and I felt that I wouldn't be able to hold out much longer, for I was growing weaker every day. One day my husband got me a bottle of Tanlac and insisted that I try it, and the way I began to improve was simply astonishing. I am now free of every one of the old troubles and never felt better in my life. I wish everybody could know what this wonderful medicine did for me."
